EXPERIENCE

UCKG Help Centre | Full-stack Developer

London, United Kingdom | 01/2024 - Present

- Responsible for developing internal systems to support nationwide operations, focusing on automation, increasing efficiency, and GDPR compliance.
 - Developed a **custom CRM** from scratch, reducing paper usage by **90%**, automating operational workflows, and significantly improving data tracking and report generation.
 - Developed a **school management system** with session tracking via badges (QR code), including classroom control, incident logging, allergy management, and full auditability of user actions and data.
 - Created a **digital pass system** for Apple Wallet and Google Wallet, supporting both "Generic" and "Events".
 - Migrated the monolithic codebase to a **microservices** architecture and implemented single sign-on (SSO) for seamless integration and authentication across projects.
 - Efficiently using Git and GitHub for version control and CI/CD secure releases.
- Technologies:** HTML/CSS, Next.js, React, JavaScript, Node.js, Express.js, Sequelize, Python, MySQL, Docker, Docker Compose, Git, Github, React-Hook-Form, React Context API, Zod, Material UI

IT Career Switch | Full-stack Developer (traineeship)

London, United Kingdom | 06/2022 - 07/2023

- Completed a full-time training program with practical projects using a variety of technologies including HTML5, CSS3, Bootstrap, JavaScript, jQuery, PHP, MySQL, and more.
 - Developed two final projects:
 - Built an interactive Gazetteer map displaying country data using external APIs.
 - Developed a system for managing employee records, following strict documentation and requirements
 - Gained valuable web development experience.
- Technologies:** HTML/CSS, Bootstrap, Javascript, jQuery, PHP, Python, Java, C#, MySQL

MundoMinecraft BR | Developer & Server Administrator

São Paulo, Brazil | 01/2018 - 04/2020

- Created a Minecraft server network that reached an average of over 300 simultaneous players, leading and coordinating a team of more than 20 staff members.
 - Responsible for researching, implementing, and configuring all Bukkit/Spigot Java plugins.
 - Helped manage the Linux environment, MySQL databases, and automated backups and updates.
- Technologies:** Linux, Shell script, MySQL, Sqlite, Spigot, Bukkit, Java, YAML
